Dear All,

Thank you again for visiting our booth at the recent International Poultry Expo 2008 in Atlanta, GA. We enjoyed meeting you and were glad that you had the chance to see our products on display as well as to discuss your requirements for wastewater treatment systems.

We displayed the Nikuni DAF Pump demonstration system to show the 20-30 micron microbubbles that the pumps generate. We incorporate the Nikuni DAF Pumps in all of our DAF systems that we manufacture as well as we **upgrade** all brands of existing DAF systems in the field. We also displayed the MBBR (Moving Bed Biofilm Reactor) demonstration system to show the technology used for the layered growth of bacteria required to remove BOD, COD and/or Ammonia in wastewater.

Please do not hesitate to call us with any questions, feedback, or applications at **1-800-607-7873**. We look forward to the opportunity of working with you on your current and upcoming wastewater treatment projects.

**Thank you** from your partners at World Water Works!
