Founded by late entertainer, Danny Thomas, St. Jude is the world's premier pediatric cancer research center. St. Jude has treated patients from all 50 states and more than 70 countries. Today, St. Jude is the single largest center in the United States for the research and treatment of pediatric cancer and other childhood catastrophic diseases in terms of the number of patients enrolled in research protocols and successfully treated. St. Jude freely shares its research findings with doctors and hospitals around the world.

No family ever pays St. Jude for medical treatment. Additionally, St. Jude covers the cost of lodging, meals and transportation. Events, like the BG US Challenge, enable St. Jude to continue their financial support of their patients challenging childhood cancer and other catastrophic illnesses.
